## First joint GWS – manroland Goss press relocation project on the way

The two web offset champions have started their first joint relocation project in Egypt

**Modern Arab Establishment for Printing and Publishing with its headquarters in Cairo opted for a used ROTOMAN press that is now going to be moved from Bechtle Druck, Germany, all the way to Egypt. For the relocation and implementation, the Egyptian printer chose GWS Printing Systems (GWS) and manroland Goss as their preferred partners.**

Modern Arab is known as the oldest private printing company in Egypt and today is still one of the largest publishers and printers of school books in the country. The manroland Goss subsidiary GWS has been holding a good relationship with the customer for almost 10 years. The ROTOMAN press for Modern Arab Establishment is the third press supplied by GWS since 2015.

The used ROTOMAN press from 2001 shows a cylinder circumference of 630 mm, a maximum web width of 965 mm and prints with a speed of 65.000 cyl.c/h. It is a 4 unit press with 1 web, 1 dryer and a folder for quarterfold production.

The press has been dismantled during the last weeks and is currently on transport to Egypt. The installation is scheduled to take place until the end of summer 2019. The dismantling was carried out by a joint team of technicians provided by the client, manroland Goss and a GWS supervisor. The technical project management has been in the hands of manroland Goss and GWS as well, so the two partner companies could once more prove their competences as web offset service providers and high-performing business partners.

The **manroland Goss Group** is the leading supplier of web-offset printing solutions. The company provides System Solutions for highly automated press and post-press equipment, Engineered Solutions for mechanical, automation and closed-loop upgrades for all types of presses, Service Solutions for parts and labor, tele-support and service level agreements 24/365, and E-commerce Solutions for all suppliers to the web offset industry and beyond.
