

LITHOMAN: Highly Automated For Greater Productivity

Investment in future success: Acorn Web Offset Ltd. opts for a 32 page LITHOMAN press from manroland Goss web systems.

Acorn Web Offset Ltd. is a medium sized printing company in Normanton, UK that is mainly producing magazines, brochures and catalogs and very much specialized in A4 and A5 printing. Acorn Web and manroland Goss web systems have been partners for over 20 years now. The new LITHOMAN is the third manroland Goss press and will replace one of two existing ROTOMAN 16-page commercial presses. Equipped with a high automation package, the new press offers great productivity and flexibility for commercial production at highest quality and with lowest waste rates.

The LITHOMAN with 4 printing units and an automatically adjustable folder will be equipped with the highest level of automation features from manroland Goss web systems containing all Inline Control Systems for cut-off, dynamic cut-off, color and ink density. This guarantees shortest make-ready and changeover times and, at the same time, lowest waste rates and highest quality for the start-up as well as for reel changes and blanket washing. The automation package is complemented with QuickStart- and QuickStopp features, what is particularly important for frequent job changes. Therewith, the press is perfectly equipped for future production demands regarding flexibility and productivity.

“We are proud of the futureproof concept we have developed together with our long-term partner Acorn Web. We are looking forward to supporting this extraordinary printer for another 20 years at least” say Dietmar Dotterweich, Deputy Vice President Sales of manroland Goss web systems, and John Ellis, Managing Director of manroland web systems UK.

manroland Goss web systems is the leading supplier of web-offset printing solutions. The company provides System Solutions for highly automated press and post-press equipment, Engineered Solutions for mechanical, automation and closed-loop upgrades for all types of presses, Service Solutions for parts and labor, tele-support and service level agreements 24/365, and E-commerce Solutions for all suppliers to the web offset industry and beyond.
