

Save energy
Reduce CO₂
Boost efficiency

VARIOMAN **c:line**

Rethink your options.
Explore the power of web offset
for packaging printing.

manroland | **GOSS**

You want to make packaging printing more sustainable?

VARIOMAN c:line combines all sustainable advantages of web offset technology in one flexible packaging printing system.

+ sleeve cylinder and automation technology
to increase efficiency even for small jobs

+ electron beam curing offset inks
to save CO₂ emissions and additional protective coating

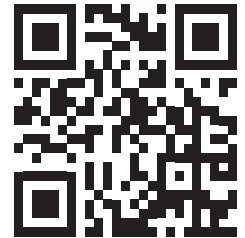

+ only 4-5 colors required
to reach highest print quality on paper and carton

+ 100% solvent free inks
to save explosion protection and exhaust air cleaning

+ inline rotary die cutter
to significantly reduce die cutting waste
