**Now available at MARKET-X.**

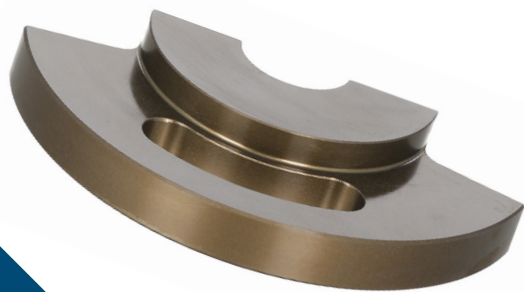

### Diverter cam cost optimization

For the LITHOMAN printing press

Installation location: Folder / diverter

Due to an optimisation in production, we were able to achieve a cost saving and now offer the splitting cam (16.22034-0189 / 16.22034-0191) up to 50 % cheaper.

#### Deutliche Preisreduzierung.

up to  
**50 %**  
cheaper

### Function of the diverter cam

The splitting cam is part of the splitting device and ensures that the product slides into the upper belt line when engaged and into the lower line when not engaged. It is recommended to always order a complete set consisting of 8x 16.22034-0189 and 2x 16.22034-0191.

#### Benefits

- Significant cost savings
- Availability: ex stock
- OEM quality

up to  
**50 %**  
cheaper

Do you see potential for improvement? We improve spare parts according to your wishes!

**Customized. In quality. Price-wise.**
