Conversion kit reinforced version for product conversion

- Due to frequent product changeover „collect/not collect“, the fastenings of the bolts often fail, this leads to malfunctions during changeover and can even lead to failure of the function.
- With our more robust version of the product conversion kit, they prevent this!
Now available at MARKET-X.

More robust conversion kit design

For the COLORMAN/GEOMAN Newspaper machines.

Installation location: Folder

The conversion kit is made of higher quality and more robust materials, which means that the bolt can be installed in a more stable manner, thus preventing faults and maintaining production safety.

Buy now and benefit!

Better quality. Lower price.

Benefits

- Price reduction of 20 %
- Increase of production safety
